DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Friday, 31 May 2024 at 05:52 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Winds blowing from the north, breezy in parts of the southeast UK, will help to keep air pollution levels generally Low across all regions. Also, gas from the Icelandic volcanic eruption may be present at detectable levels in air passing over the UK today and some odour may be noticeable, particularly in Northern Ireland and Scotland. Tomorrow: Air pollution is forecast to remain Low across the UK on Saturday.

Outlook: Air pollution levels are forecast to continue at Low levels across the UK.
